CF Bitcoin Interest Rate Curve

Index Description

The CF Bitcoin Interest Rate Curve is a measure of the underlying economic reality of bitcoin borrowing and lending, whether outright or implied in traded instruments. This is accomplished by the use of transactional input data from crypto Futures Exchanges, DeFi Lending Protocols and OTC Crypto Lenders. All published individual interest rates that constitute the interest rate curve represent transparent indicators and build on our experience to accelerate the professionalisation of crypto trading and associated borrowing and lending activity. Each point on the interest rate curve aims to be representative, replicable and efficient to facilitate the creation of financial products such as interest rate derivative contracts.

Interest Rate Curve

Calculation Overview

Index Facts	
Asset	Bitcoin (BTC)
Denomination	Bitcoin (BTC)
