2 Overview

The CF Spot Rates have been specifically designed to serve as a transparent and representative indicator of the instantaneous price of a digital asset for the purposes of calculating margining requirements for futures trading and other financial instruments. No further applications of the CF Settlement Prices have been taken into consideration in its design.

This document covers the methodology for calculating the CF Spot Rates. A summary of specifications is provided in Section 7.

Underlying Economic Reality

The CF Spot Rates are intended to measure the underlying economic reality of the exchange of the base asset for the quote asset and vice versa. This is accomplished by the use of order input data from markets that facilitate the trading of the base asset for the quote asset, markets where the quote asset is made fungible with Accepted Assets by the Constituent Exchange as a means of transacting for the base asset including markets where the quote asset is fungible with Accepted Assets on a 1:1 basis, , the criteria for eligibility for which are available in the CF Constituent Exchange Criteria.

3 Definitions

Accepted Asset: a digital asset that is a fully reserve backed digital token, commonly referred to as a “stablecoin”, that seeks to peg its value to that of the quote asset, where the stablecoin issuer operates a 1:1 redemption facility that is accessible to all Accepted Asset holders. Furthermore only digital assets that solely hold reserve assets that are in line with the prevailing regulations enforced for government security money market funds in major jurisdiction such as the US, UK and EU. Accepted Assets are subject to the approval of the CF Cryptocurrency Index Family Oversight Function in accordance with the CF Cryptocurrency Index Family Oversight Function Specifications

Accepted Asset List:

| Name | Ticker Symbol |
|----------|---------------|
| USD Coin | USDC |

API: Application programming interface.

Calculation Time: Any time as of which a CF Spot Rate is published.

Constituent Exchange: A cryptocurrency trading venue approved by CF management to serve as pricing source for the calculation of a CF Spot Rate

Relevant Pair: The cryptocurrency versus cryptocurrency or legal tender pair referenced by a CF Spot Rate, as defined in Section 6.

Relevant Order Book: The universe of the currently unmatched limit orders to buy or sell a unit of cryptocurrency versus cryptocurrency or legal tender on a Constituent Exchange in the Relevant Pair, aggregated by price, that is reported through its API to the Calculation Agent.

Retrieval Time: The time, as given by the server clock of the Calculation Agent, as of which the Relevant Order Book of a Constituent Exchange is requested by the Calculation Agent through the API of the Constituent Exchange.

4 Methodology and Rules

4.1 Qualitative Description

The CF Spot Rates are calculated in real time based on the Relevant Order Books of all Constituent Exchanges. An order book is a list of buy and sell orders with associated limit prices and sizes that have not yet been matched due to lack of supply or demand to trade at that price. It therefore informs about the price at which a trader can buy or sell a certain amount of cryptocurrency as of now. In line with existing cryptocurrency market practises, the "order size" refers to the aggregated sizes of all orders at the same price, the price/sizes tuples of buy orders ("bids") descend by price and the price/size tuples of sell orders ("asks") ascend by price.

Calculation steps are as follows:

1. At the Effective Time, the Relevant Order Book of each Constituent Exchange is added to a joint list of order books.
2. The joint list of order books is aggregated into one consolidated order book. If the size of a bid or ask order price level exceeds the order size cap, it enters the consolidated order book with a size equal to the order size cap.
3. The cumulative bid price-volume curve, ask price-volume curve, mid price-volume curve and mid spread-volume curve are calculated from the consolidated order book at a granularity equal to the spacing parameter.
 - a. The bid price-volume curve maps transaction volume to the marginal price per cryptocurrency unit a seller is required to accept in order to sell this volume to the consolidated order book.
 - b. The ask price-volume curve maps a transaction volume to the marginal price per cryptocurrency unit a buyer is required to pay in order to purchase this volume from the consolidated order book.
 - c. The mid price-volume curve represents the average of the bid price-volume curve and the ask price-volume curve.
 - d. The mid spread-volume curve represents the percentage deviation of the ask price-volume curve from the mid price-volume curve.
4. The utilized depth is calculated as the maximum cumulative volume for which the mid spread-volume curve does not exceed a certain percentage deviation from the mid price. If this volume is less than the spacing parameter, the utilized depth is set to the spacing parameter.

5. The mid price-volume curve is weighted by the normalized probability density of the exponential distribution up to the utilized depth.
6. The CF Spot Rate is then given by the sum of the weighted mid price-volume curve obtained in the previous step.

4.2 Mathematical Representation

The following table shows the symbols used in the mathematical representation of CF Spot Rates.

| Symbol | Name | Description | Type |
|---|--------------------|---|------------------------------------|
| T | Effective time | The time at which a CF Spot Rate is calculated | Parameter, see Section 6 |
| C_T | Order size cap | The size above which any excess size of a bid or ask order price level is discarded | Internal variable, see Section 4.3 |
| D | Deviation from mid | The maximum percentage deviation of a limit order price level from the mid price-volume curve, until which that limit order price level is used for the calculation of a CF Spot Rate | Parameter, see Section 6 |
| λ | Lambda | A parameter that determines the shape of the probability density function of the exponential distribution | Parameter, see Section 6 |
| s | Spacing | The spacing granularity of a price-volume curve | Parameter, see Section 6 |
| v | Volume | The independent variable of a price-volume curve | Internal variable |
| A_T | Ask orders | The ask order price levels of the consolidated order book as of the effective time, ordered ascending by price | Input |
| $a_{T,i}$ with $a_{T,i} = (ap_{T,i}, as_{T,i})$, $a_{T,i} \in A_T, as_{T,i} = \min\{as_{T,i}, C_T\}$ | Ask order | The i th price/size ask order pair of the consolidated order book | Input |
| B_T | Bid orders | The bid order price levels of the consolidated order book as | Input |

| | | | |
|---|----------------------|---|--------|
| | | of the effective time, ordered descending by price | |
| $b_{T,i}$ with $b_{T,i} = (bp_{T,i}, bs_{T,i})$ $b_{T,i} \in B, bs_{T,i} = \min\{bs_{T,i}, C_T\}$ | Bid order | The i th price/size bid order pair of the consolidated order book | Input |
| NF | Normalization factor | A parameter chosen such that $\frac{1}{NF} \sum_{v \in \{s, 2s, \dots, \bar{v}_T\}} \lambda e^{-\lambda v} = 1$ | Output |
| $CCRTI_T$ | CCRTI | The CF Spot Rate at time T | Output |

Using the above notation, we define the ask price-volume curve, $askPV_T$, the bid price-volume curve, $bidPV_T$, the mid price-volume curve, $midPV_T$, and the mid spread-volume curve, $midSV_T$, in each case as of the effective time T , as:

| | |
|---|--------|
| $a_{T,i}^\Sigma = \sum_{j=1}^i a s_{T,j}$ | Eq. 1a |
| $b_{T,i}^\Sigma = \sum_{j=1}^i b s_{T,j}$ | Eq. 1b |
| $p = \min \left(\left\lfloor \frac{1}{s} \min(a_{T, A_T }^\Sigma, b_{T, B_T }^\Sigma) \right\rfloor, 50000 \right)$ | Eq. 1c |
| $V = \{ns 1 \leq n \leq p\}$ | Eq. 1d |
| $askPV_T(v): v \in V = \begin{cases} ap_{T,1} & \text{if } v \leq a_{T,1}^\Sigma \\ ap_{T,2} & \text{if } a_{T,1}^\Sigma < v \leq a_{T,2}^\Sigma \\ \dots & \dots \\ ap_{T, A_T -1} & \text{if } a_{T, A_T -2}^\Sigma < v \leq a_{T, A_T -1}^\Sigma \\ ap_{T, A_T } & \text{otherwise} \end{cases}$ | Eq. 1e |
| $bidPV_T(v): v \in V = \begin{cases} bp_{T,1} & \text{if } v \leq b_{T,1}^\Sigma \\ bp_{T,2} & \text{if } b_{T,1}^\Sigma < v \leq b_{T,2}^\Sigma \\ \dots & \dots \\ bp_{T, B_T -1} & \text{if } b_{T, B_T -2}^\Sigma < v \leq b_{T, B_T -1}^\Sigma \\ bp_{T, B_T } & \text{otherwise} \end{cases}$ | Eq. 1f |
| $midPV_T(v): v \in V = \frac{askPV_T(v) + bidPV_T(v)}{2}$ | Eq. 1g |
| $midSV_T(v): v \in V = \frac{askPV_T(v)}{midPV_T(v)} - 1$ | Eq. 1h |

The utilized depth, \bar{v}_T , is calculated as:

| | |
|---|--------------|
| $\bar{v}_T = \max(v \text{ where } midSV_T(v) \leq D \text{ and } midSV_T(v + s) > D, s)$ | Eq. 2 |
|---|--------------|

The CF Spot Rate as of the effective time T , $CCRTI_T$, is then given by:

| | |
|---|--------------|
| $CCRTI_T = \sum_{v \in \{s, 2s, \dots, \bar{v}_T\}} midPV_T(v) \frac{1}{NF} \lambda e^{-\lambda v}$ | Eq. 3 |
|---|--------------|

4.3 Dynamic Order Size Cap

Unless specified as a fixed value in Section 6, the order size cap is calculated from the uncapped consolidated order book. The following symbols are used in the calculation of the order size cap:

| Symbol | Name | Description |
|--|--------------------------------------|---|
| ac_T | Ask sample size | The number of samples used for ask-side sizes |
| bc_T | Bid sample size | The number of samples used for bid-side sizes |
| $S_T = \{s_{T,1}, s_{T,2}, \dots, s_{T,n_T}\}$ | Size sample set | The consolidated set of sizes, ordered by ascending size |
| k | Trimming / winsorizing size | The number of samples to trim or winsorize from S_T |
| \bar{s} | Trimmed mean | The trimmed mean of the sample set S_T |
| $S'_T = \{s'_{T,1}, s'_{T,2}, \dots, s'_{T,n_T}\}$ | Winsorized sample set | The winsorized sample set of S_T |
| \bar{s}' | Winsorized mean | The mean of the winsorized sample set S'_T |
| σ | Winsorized sample standard deviation | The sample standard deviation of the winsorized sample set S'_T |

Using the above notation, the dynamic order size cap is derived as follows:

| | |
|---|--------|
| $ac_T = \max\left(\max_{1 \leq i \leq A_T } \{i \mid ap_{T,i} \leq 1.05ap_{T,1}\}, \min(A_T , 50)\right)$ | Eq. 4a |
| $bc_T = \max\left(\max_{1 \leq i \leq B_T } \{i \mid bp_{T,i} \geq 0.95bp_{T,1}\}, \min(B_T , 50)\right)$ | Eq. 4b |
| $S_T = [bs_{T,1}, bs_{T,2}, \dots, bs_{T,bc_T}] \cup [as_{T,1}, as_{T,2}, \dots, as_{T,ac_T}]$ $S_T = [s_{T,1}, s_{T,2}, \dots, s_{T,n_T}] \text{ where } s_{T,1} \leq s_{T,2} \leq \dots \leq s_{T,n_T}$ | Eq. 4c |
| $k = \lfloor 0.01n_T \rfloor$ | Eq. 4d |
| $\bar{s} = \frac{1}{n_T - 2k} \sum_{i=k+1}^{n_T-k} s_{T,i}$ | Eq. 4e |
| $s'_{T,i} = s_{T,k+1} \text{ if } i \leq k$ $s'_{T,i} = s_{T,n-k} \text{ if } i > n - k$ $s'_{T,i} = s_{T,i} \text{ otherwise}$ | Eq. 4f |
| $\bar{s}' = \frac{1}{n_T} \sum_{i=1}^{n_T} s'_{T,i}$ | Eq. 4g |
| $\sigma = \sqrt{\frac{1}{n_T - 1} \sum_{i=1}^{n_T} (s'_{T,i} - \bar{s}')^2}$ | Eq. 4h |

The order size cap as of the effective time T , C_T , is then given by:

| | |
|---------------------------|-------|
| $C_T = \bar{s} + 5\sigma$ | Eq. 5 |
|---------------------------|-------|

5 Contingency Calculation Rules

5.1 Delayed Data

Delayed data is treated according to the following rules:

1. If the Retrieval Time of the Relevant Order Book of a Constituent Exchange is at least 30 seconds older than the Calculation Time, the Constituent Exchange is disregarded in the calculation of the CF Spot Rate for that Calculation Time.

If the Retrieval Times of the Relevant Order Books of all Constituent Exchanges are each at least 30 seconds older than the Calculation Time, a CF Spot Rate calculation failure occurs for that Calculation Time (see Section 5.5).

5.2 Erroneous Data

5.2.1 Erroneous Books

All Relevant Order Books are subject to an automated screening for erroneous data according to the following rules:

1. If the format of a Relevant Order Book deviates from the expected format such that it cannot be parsed, it is flagged as erroneous.
2. If the Relevant Order Book contains no bid orders or no ask orders, it is flagged as erroneous.
3. If the Relevant Order Book crosses, it is flagged as erroneous.

Relevant Order Books flagged as erroneous for a given Calculation Time are disregarded in the calculation of the CF Spot Rate for that Calculation Time.

If the Relevant Order Books of all Constituent Exchanges are flagged as erroneous for a given Calculation Time, a CF Spot Rate calculation failure occurs for that Calculation Time (see Section 5.5).

5.2.2 Erroneous Prices

All Relevant Order Books are subject to an automated filtering process according to the following rule.

1. If a Relevant Order Book contains any entries with a non-numeric or non-positive limit price or size then any such entries are flagged as erroneous.

All entries in a Relevant Order Book which are flagged as erroneous for a given Calculation Time are disregarded in the calculation of the CF Spot Rate for that Calculation Time.

5.3 Potentially Erroneous Data

All Relevant Order Books are subject to an automated screening for potentially erroneous data according to the following rules:

1. For each Constituent Exchange individually, the current mid price is calculated as the average of the highest bid price and the lowest ask price of the Relevant Order Book.
2. For each Constituent Exchange, the absolute percentage deviation of the mid price, as calculated in the previous step, from the median of the mid prices of all Constituent Exchanges is calculated.
3. If for any Constituent Exchange the absolute percentage deviation, as calculated in the previous step, exceeds the Potentially Erroneous Data Parameter for the respective Spot Rate represented in the Spot Rate Parameters (section 6) then the Relevant Order Book of that Constituent Exchange for the affected Spot Rate is flagged as potentially erroneous.
4. Upon an orderbook of a Constituent Exchange having been disregarded in the calculation as described in the previous step, its orderbook shall continue to be disregarded from the calculation of the affected index until the absolute deviation of the mid-price of its orderbook as calculated in step 2 is less than 50% of the Potentially Erroneous Data Parameter. At this point it shall be re-instated to the calculation for that Calculation Time and all subsequent Calculation Times unless it is removed from the calculation for any of the reasons as described in section 5.

Relevant Order Books flagged as potentially erroneous for a given Calculation Time are disregarded in the calculation of the CF Spot Rate for that Calculation Time. The occurrence of any such flag is reported to the Oversight Function.

If the Relevant Order Books of all Constituent Exchanges are flagged as potentially erroneous for a given Calculation Time, a CF Spot rate Calculation Failure occurs for that Calculation Time (see Section 5.5).

5.4 Expert Judgement

The Administrator does not utilise expert judgment in the day to day calculation of the Spot Rates. In extraordinary circumstances Expert Judgement may be exercised by the

Administrator in accordance with its codified policies and processes which are available upon request.

5.5 Calculation Failure

If a CF Spot Rate cannot be calculated for a given Calculation Time, for instance because:

- the Retrieval Times of the Relevant Order Books of all Constituent Exchanges are each at least 30 seconds older than the Calculation Time, or
- all Relevant Order Books are flagged as erroneous or potentially erroneous (see Section 5.2); or
- any other reason or circumstance that prevents the orderly calculation of a CF Spot Rate,

then the CF Spot Rate for that Calculation Time is not published. The occurrence of any CF Spot Rate calculation failure is reported to CF management and persistent failure will lead to a review of the methodology.

6 Spot Rate Parameters

6.1 Constants

| | |
|--|---|
| Effective Time (T) | Approximately every second of each day for the entire year including weekends and holidays. |
| Lambda (λ) | $\frac{1}{0.3\bar{v}_T}$ |

6.2 Spot Rate Parameters

The following table summarizes the parameters for the currently supported CF Spot Rates:

| | Spacing (s) | Deviation from Mid (D) | Potentially Erroneous Data Parameter | Order Size Cap (C_T) |
|-----------------------------------|---------------------------------|--|---|--|
| CF Ripple-Dollar Spot Rate | 10000 | 1% | 10% | Dynamic |

| | | | | |
|--|--------|----|-----|---------|
| CF EOS-Dollar Spot Rate | 1000 | 1% | 10% | Dynamic |
| CF PAX Gold-Dollar Spot Rate | 1 | 2% | 10% | 25 |
| CF OMG Network-Dollar Spot Rate | 10000 | 1% | 10% | Dynamic |
| CF Orchid-Dollar Spot Rate | 1000 | 1% | 10% | Dynamic |
| CF Basic Attention Token-Dollar Spot Rate | 10000 | 1% | 10% | Dynamic |
| CF Dai-Dollar Spot Rate | 10000 | 1% | 5% | Dynamic |
| CF Compound-Dollar Spot Rate | 10 | 1% | 10% | Dynamic |
| CF Aave-Dollar Spot Rate | 10 | 1% | 10% | Dynamic |
| CF Dogecoin-Dollar Spot Rate | 10000 | 1% | 10% | Dynamic |
| CF Maker-Dollar Spot Rate | 1 | 1% | 10% | Dynamic |
| CF TheGraph-Dollar Spot Rate | 1000 | 1% | 10% | Dynamic |
| CF YearnFinance-Dollar Spot Rate | 1 | 1% | 10% | Dynamic |
| CF Synthetix-Dollar Spot Rate | 100 | 1% | 10% | Dynamic |
| CF Amp-Dollar Spot Rate | 100000 | 1% | 10% | Dynamic |
| CF Curve-Dollar Spot Rate | 1000 | 1% | 10% | Dynamic |
| CF Decentraland-Dollar Spot Rate | 1000 | 1% | 10% | Dynamic |

| | | | | |
|--|-------|----|-----|---------|
| CF Enjin-Dollar Spot Rate | 1000 | 1% | 10% | Dynamic |
| CF Chiliz-Dollar Spot Price | 10000 | 1% | 10% | Dynamic |
| CF Livepeer-Dollar Spot Rate | 100 | 1% | 10% | Dynamic |
| CF Sushiswap-Dollar Spot Rate | 100 | 1% | 10% | Dynamic |
| CF Sandbox-Dollar Spot Rate | 10000 | 1% | 10% | Dynamic |
| CF Rarible-Dollar Spot Rate | 100 | 1% | 25% | Dynamic |
| CF AxiInfinity-Dollar Spot Rate | 10 | 1% | 10% | Dynamic |
| CF Loopring-Dollar Spot Rate | 10000 | 1% | 10% | Dynamic |

7 Spot Rate Specifications

The following tables summarize the specifications for the currently supported CF Spot Rates:

| | |
|--------------------------------|---|
| Administrator | CF Benchmarks Ltd |
| Calculation Agent | CF Benchmarks Ltd |
| Calculation Methodology | Real time aggregation of order book data of Constituent Exchanges |
| Dissemination Time | Approximately every second of each day for the entire year including weekends and holidays. |

| Index | Ticker Symbol | Short Description | Dissemination Precision |
|--|---------------|--|-------------------------|
| CF Ripple-Dollar Spot Rate | XRPUSD_RTI | Instantaneous U.S. Dollar price of one XRP | 0.00001 U.S. Dollars |
| CF EOS-Dollar Spot Rate | EOSUSD_RTI | Instantaneous U.S. Dollar price of one EOS | 0.001 U.S. Dollars |
| CF PAX Gold-Dollar Spot Rate | PAXGUSD_RTI | Instantaneous U.S. Dollar Price of one PAX Gold token | 0.01 U.S. Dollars |
| CF OMG Network-Dollar Spot Rate | OMGUSD_RTI | Instantaneous U.S. Dollar price of one OMG Network token | 0.01 U.S. Dollars |
| CF Orchid-Dollar Spot Rate | OXTUSD_RTI | Instantaneous U.S. Dollar price of one Orchid token | 0.0001 U.S. Dollars |
| CF Basic Attention Token-Dollar Spot Rate | BATUSD_RTI | Instantaneous U.S. Dollar price of one BAT | 0.001 U.S. Dollars |
| CF Dai-Dollar Spot Rate | DAIUSD_RTI | Instantaneous U.S. Dollar price of one Dai | 0.00001 U.S. Dollars |
| CF Compound-Dollar Spot Rate | COMPUSD_RTI | Instantaneous U.S. Dollar price of one Compound | 0.01 U.S. Dollars |
| CF Aave-Dollar Spot Rate | AAVEUSD_RTI | Instantaneous U.S. Dollar price of one Aave | 0.01 U.S. Dollars |
| CF Dogecoin-Dollar Spot Rate | DOGEUSD_RTI | Instantaneous U.S. Dollar price of one Dogecoin | 0.0001 U.S. Dollars |
| CF Maker-Dollar Spot Rate | MKRUSD_RTI | Instantaneous U.S. Dollar price of one Maker | 0.01 US Dollars |
| CF TheGraph-Dollar Spot Rate | GRTUSD_RTI | Instantaneous U.S. Dollar price of one TheGraph | 0.0001 US Dollars |
| CF YearnFinance-Dollar Spot Rate | YFIUSD_RTI | Instantaneous U.S. Dollar price of one YearnFinance | 0.01 US Dollars |
| CF Synthetix-Dollar Spot Rate | SNXUSD_RTI | Instantaneous U.S. Dollar price of one Synthetix | 0.001 US Dollars |
| CF Amp-Dollar Spot Rate | AMPUSD_RTI | Instantaneous U.S. Dollar price of one Amp | 0.00001 US Dollars |

| | | | |
|---|--------------|---|-------------------|
| CF Curve-Dollar Spot Rate | CRVUSD_RTI | Instantaneous U.S. Dollar price of one Curve | 0.001 US Dollars |
| CF Decentraland-Dollar Spot Rate | MANAUSD_RTI | Instantaneous U.S. Dollar price of one Decentraland | 0.001 US Dollars |
| CF Enjin-Dollar Spot Rate | ENJUSD_RTI | Instantaneous U.S. Dollar price of one Enjin | 0.01 US Dollars |
| CF Chiliz-Dollar Spot Price | CHZUSD_RTI | Instantaneous U.S. Dollar price of one Chiliz | 0.0001 US Dollars |
| CF Livepeer-Dollar Spot Rate | LPTUSD_RTI | Instantaneous U.S. Dollar price of one Livepeer | 0.01 US Dollars |
| CF Sushiswap-Dollar Spot Rate | SUSHIUSD_RTI | Instantaneous U.S. Dollar price of one Sushiswap | 0.01 US Dollars |
| CF Sandbox-Dollar Spot Rate | SANDUSD_RTI | Instantaneous U.S. Dollar price of one Sandbox | 0.0001 US Dollars |
| CF Rarible-Dollar Spot Rate | RARIUSD_RTI | Instantaneous U.S. Dollar price of one Rarible | 0.01 US Dollars |

Notice and Disclaimer

CF Benchmarks Ltd is registered in England with registered number 11654816 and registered office at 6th Floor, One London Wall, London EC2Y 5EB, United Kingdom. CF Benchmarks is authorised by the UK Financial Conduct Authority as a registered Benchmark Administrator (FRN 847100).

This document and all of the information contained in it, including without limitation all methods, processes, concepts, text, data, graphs, charts (collectively, the "Information") is the property of CF Benchmarks Ltd or its licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with CF Benchmarks Ltd, the "Information Providers") and is provided for informational purposes only. The Information may not be reproduced or disseminated in whole or in part without prior written consent from CF Benchmarks Ltd.

The Information may not be used to create derivative works or to verify or correct other data or information without prior written consent from CF Benchmarks Ltd. For example (but without limitation), the Information may not be used to create indices, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other CF Benchmarks Ltd data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. CF BENCHMARKS SOEA NOT MAKE ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IT EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall CF Benchmarks have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or wilful default of itself, its servants, agents or sub-contractors.

None of CF Benchmarks Ltd's products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and none of CF Benchmarks Ltd's products or services is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Any use of or access to products, services or information of CF Benchmarks Ltd requires a license from CF Benchmarks Ltd.
